Zinc Oxide (ZnO) Nanopowder/ Nanoparticles Dispersion
Form: Dispersion

Specifications

Zinc Oxide Nanopowder/ Nanoparticles (ZnO)
ZnO dispersion primary particle size: 8~12nm;
ZnO dispersion agglomerated particle size: 30~50nm;
ZnO dispersion content: 30% ~50%

TEM

PSD

- ZnO powder is available in different solvents, such as xylene, Toluene, water or per customers' requests.
- General applications includes Paint Coating, Pottery field, Fiber, Textile, cosmetics and etc.
